Cambridge Carbonates Ltd
Expertise in carbonate and evaporite systems

Well name: O18-01 **Date:** 18 December 2018 **Scale:** 1:50

Formation: Core 6: Beveland Formation **Logging Team:** Peter GUTTERIDGE/ Alberto RIVA/ Jo GARLAND

Carbonates:

Sedimentary Structures:

Structureless

Stylonodular bedding

Components:

gastropod

bivalve debris

echinoderms

crinoids

burrows - low rate

Brachiopod

Lithology:

Dolomite

Calcareous Dolomite

Diagenetic features:

Karst features:

Karst association:

Clastics:

Sedimentary Structures:

Components:

Main cement type:

Calcite

Depositional Environment:

Below storm wave base

Bed contacts:

sharp

scoured

gradational

Fracture:

Open fracture

Cemented fracture
