

Fees of seismic data requests

March 2023.

The seismic data that can be downloaded directly from NLOG is excluded from any fees. All fees below are excluding value-added tax (BTW) and the additional costs of a delivery medium such as portable hard drives.

- | | <i>Cost</i> |
|--|---|
| <ul style="list-style-type: none">• Digital 3D Seismic Data | |
| Post-stack (re)processed 3D survey | €600 per survey |
| Pre-stack 3D survey (field data) | €2000* per seismic input data set |
| <i>*The Z3FUG2012A (DEF) survey is subject to an additional fee due to its large file size.</i> | |
| <ul style="list-style-type: none">• Digital 2D Seismic Data | |
| Post-stack (re)processed 2D | |
| - If the coordinates are already in the headers | €200 for the first line
€60 for the subsequent lines |
| - No coordinates in headers, with reconstruction by TNO | €400 per line |
| <i>Frequently the digital Post-stack 2D seismic data, as supplied to TNO, have no coordinates in the trace headers. These coordinates can be reconstructed when the line is requested.</i> | |
| Pre-stack 2D (field data) | €400 per line |
| <ul style="list-style-type: none">• Analogue 2D seismic line from paper or film | |
| High resolution scan | €200 for the first line
€60 for the subsequent lines |
| Digital SEG-Y file, vectorization from scan | A specific calculation is done per scan |

Requests can be made directly from the NLOG website when browsing the data section or through either the contact form (<https://www.nlog.nl/en/contact>) or sending an email to info@nlog.nl.

Delivery times can vary from a week, if we have the data in our archive, to months if the data has to be requested from external parties.
