Introduction

There is hardly any protest on how unconventional resources are classified; only the methods of exploitation will change. However, there might be a need to refine the definition of the (un)conventional resources. For example, there is no need to define unconventional resources in a single, comprehensive manner. What is unconventional about unconventional resources? In order to unlock these resources an inventory is necessary. In the Netherlands unconventional type 1 has progressed from (Coal Bed Methane, Shale Gas, Basin Centred Gas). production methods are used (shallow gas, tight gas).

What is unconventional about unconventional resources?

In order to unlock these resources an inventory is necessary. In the Netherlands unconventional type 1 has progressed from (Coal Bed Methane, Shale Gas, Basin Centred Gas). production methods are used (shallow gas, tight gas).

Unconventional resources from concept to volumes

Coal Bed Methane (CBM) and Shale Gas high potential

High potential areas accessible?

Unconventional resources from concept to volumes

Coal Bed Methane

Gas Shales in Focus
